How to make a Natural Pesticide

Some natural pesticide ingredients and the pests they repel:

- Caterpillars

- Cutworms

- Caterpillars
- Cutworms

You can also try...

adding a few spoons of Paraffin to the

Marigold

- Ants
- Caterpillars
- Nematodes
- Cutworms

Chili

- Ants
- Aphids
- Caterpillars
- Beetles
- Cutworms

Melia or Neem

- Banana weevils
- Caterpillars
- Fungal diseases

You don't have to use all the ingredients. Each one works with some pests. You can make a natural pesticide by using several ingredients together.

pesticide; sprinkling Wood Ash for sucking insects, and fungus.

Step by Step

Cut the ingredients into small pieces and put them in a container with water and cover.

2.

Leave covered for three days or boil for 20 minutes

Dilute each cup of pesticide with one cup of soapy water and apply it carefully on the plants.

How many ingredients do vou need?

With five liters of water use:

- 6 cups tomatoe leaves
- 2 cups Phytalacca leaves
- 7 cups Marigold leaves
- 1 cups Chili
- 5 cups Neem/Melia leaves
- 7 bulbs onion/garlic
