

# Using ECHO Resources ([/en/resources/300ff159-187d-49c4-9741-72ea26a1a384](https://www.echocommunity.org/en/publication_issues/898/edit))

## ECHOcommunity Mobile App

---

Available on iOS version 10+ and Android version 5+

Search "echocommunity" in the App Store on your iPhone or in Google Play on your Android phone.

Through ECHOcommunity Mobile you can discover ideas, research, and training on a wide variety of subject matter pertaining to agriculture and community development. ECHO's resources focus on small-scale agriculture in the tropics and sub-tropics and come from ECHO staff, network members, and development partners around the globe.

This app is designed to allow you to efficiently discover relevant resources and download them on your mobile device. Resources added to your library remain available when there is no internet connection and can be shared with others.

For users who acquire seeds from the ECHO seed banks you can track and report the progress of your seed trial using this app. Recording crop lifecycle events from receipt through harvest is easily accomplished throughout the seed-trial process.

The app allows you to record relevant data such as what and when you plant, weather events, interventions such as mulching, cultivation, pruning, and harvest. Along with each entry pictures and notes can be stored for future reference. The data is retained in the cloud, so you will be able to look back at the seeds you have tried and how the trials worked for you.

### Features

- Access to thousands of resources and videos, available as soon as they are added to ECHOcommunity.org
- Offline storage and sharing of downloaded materials
- The ability to ask questions of the global ECHO community

You can view the app store entries on your computer at :
